## BEFORE YOU BEGIN

Before beginning assembly, make sure all parts are present. Compare parts received with the parts list. If any part is missing or damaged, do NOT attempt to assemble the product. Please read and understand this entire manual before attempting to assemble, operate or install this product. If you have any questions regarding the product, please contact customer service.

## GENERAL INFORMATION

Your new Kingsmen Bar Stool is made from the finest materials available. It should provide many years of enjoyment with minimal care.

Keep your Kingsmen Bar Stool clean. For best results, clean with a soft, damp cloth. If you use furniture covers, always make sure the Kingsmen Bar Stool is clean and completely dry before covering, as mold may form in dark, wet places. Remove cushions prior to covering and store them in a dry, temperature controlled place. Check the hardware on your Kingsmen Bar Stool regularly to make sure it is secure.

The weight limit is 330 LB/150 KG.

*You will also need a screwdriver with medium blade.*

Assembly of this item involves **Mortise and Tenon Joints**. A **Mortise** is a notch or hole in a piece of wood designed to receive a **Tenon** of corresponding dimensions.

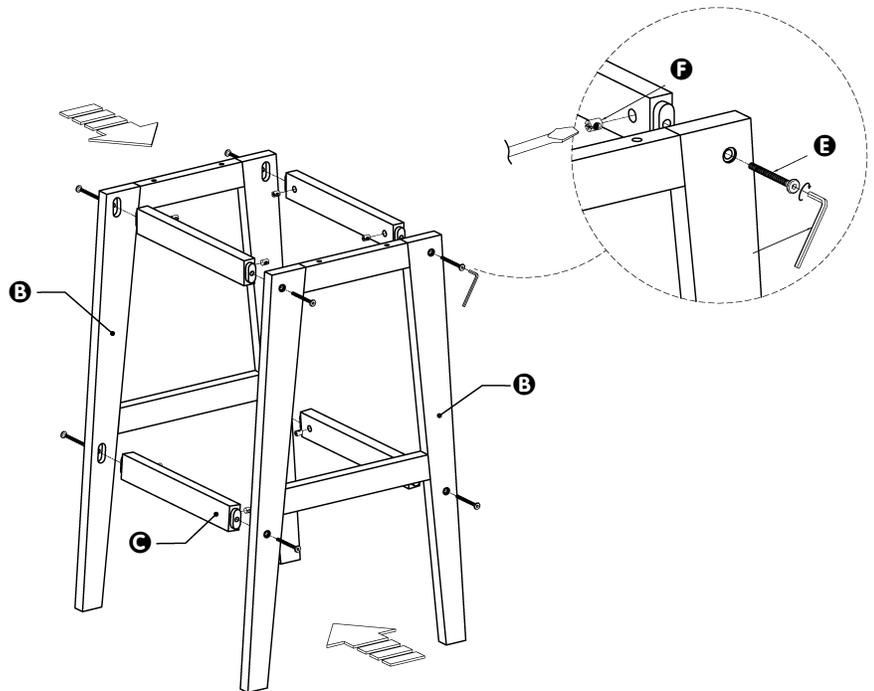

Assemble in a clear area on a spacious, nonabrasive surface such as a carpet or blanket. Do not over-tighten hardware.

**1** Assemble the barstool base: Insert a total of 8 **Barrel Bolts** **F** into the holes at either end of all 4 **Rungs** **C**. Use your screwdriver to rotate each **Barrel Bolt** so the threaded hole aligns with the hole at the end of the **Rung**.

Insert the tenon at the end of the first **Rung** **C** into one of the mortises in one of the **Leg Panels** **B**. Attach the two pieces by inserting a **Bolt** **E** through the hole in the **Leg Panel** and into the end of the **Rung**. Tighten partway using the **Hex Wrench** but do not fully tighten. Repeat to attach the remaining 3 **Rungs**.

Align the mortises on the second **Leg Panel** with the free ends of the **Rungs**. Adjust the **Rungs** as necessary to fit their tenons into the mortises on the **Leg Panel**. Join the **Leg Panel** to the **Rungs** using 4 **Bolts** **E**.

Check that the barstool frame sits squarely and level on the ground, then tighten all hardware using the **Hex Wrench**, but do not over-tighten.

Hardware Used:

**E Bolt (M6x60) x8**

**F Barrel Bolt x8**

**2** Place the **Seat** **A** upside-down on a non-abrasive surface. Turn the assembled barstool base upside-down and align the holes drilled through upper support of the **Leg Panel** with the holes drilled into the underside of the **Seat**. Insert a **Bolt** **D** into each of the 4 sets of aligned holes. Tighten using the **Hex Wrench** but do not over-tighten.

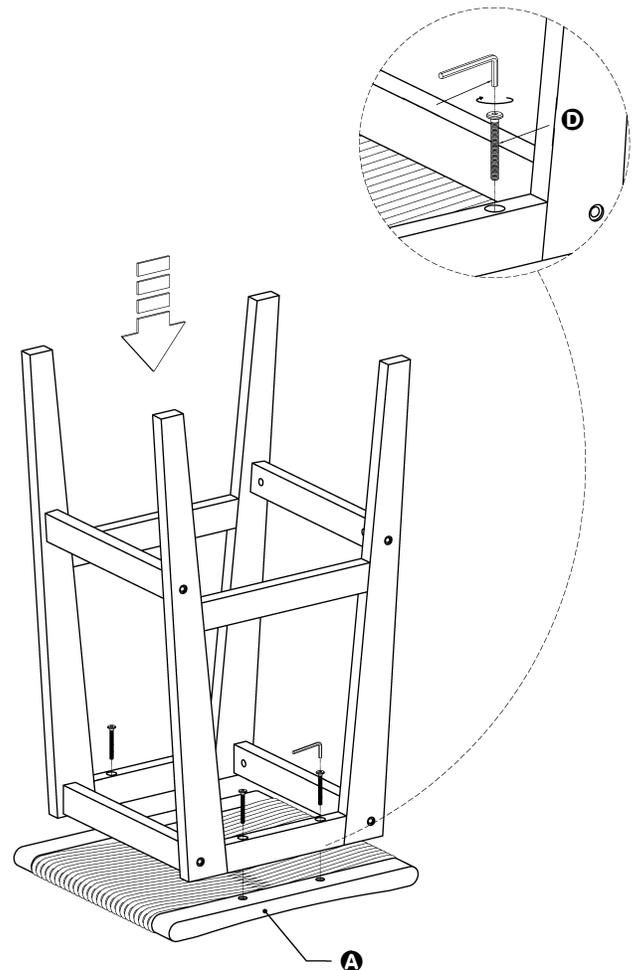

Carefully turn the assembled unit upright. Check that all hardware is secure.

**Your Kingsmen Bar Stool is complete!**
