

RESTING BIRDS CERAMIC TIERED WATER FOUNTAIN SSS-382

Read the assembly instructions carefully and follow the care instructions. Keep these instructions for future reference.

Select a smooth, level surface to place the fountain.

Assemble components of this fountain on a soft, clean surface to avoid scratching or damaging the finish.

PARTS	QTY.
Top Tier	1
Bottom Bowl	1
Pedestal	1
Electric Submersible Pump	1

ASSEMBLY

- Place the bottom bowl onto the pedestal and twist clockwise to lock into place.
- Run the pump power cable through the tube in the bottom bowl and pull it out through the groove in the back-side of the pedestal.
- Attach the pump to the built-in tubing of the top tier.
- Gently place the top tier onto the bottom bowl ensuring the pump is touching the basin in the bottom bowl.
- Fill the fountain with enough water to keep the pump fully submerged during operation.
- Plug the power cord into an electrical outlet.

Note: When first used, there may be air in the pump. It may take several minutes for trapped air to escape, allowing water to flow.

⚠ IMPORTANT INFORMATION ⚠

USE & CARE

- For outdoor use only. Some splashing is normal; adjust the flow rate on the pump if the water rate is too high.
- Check the water level frequently to ensure the pump remains fully submerged; never allow the pump to run dry as it will burn out the motor.
- Only use water in this fountain; distilled water will help prevent mineral buildup but is not required, tap water is okay to use.
- Periodically change the water to keep the water, fountain and pump clean. Remove scale and build-up regularly.
 - DO NOT use harmful additives such as bleach, chlorine, etc.
 - DO NOT use anything abrasive to scrub the fountain.
 - DO NOT use a pressure washer.
- Always shut off the power supply before cleaning and maintaining the fountain and the recirculating pump.
- Take care when handling the pump; only pick it up by the body of the pump, never the power cord.
- During freezing weather, drain the fountain, disconnect the pump and store indoors; allowing ice to form will crack the ceramic.

TROUBLESHOOTING

- Ensure that the pump is fully submerged and add water to the basin if necessary.
- Check to make sure the power outlet is working; if in doubt about electrical connections, consult a certified electrician.
- Check the pump and tubing for obstructions.
- Check the flow control on the body of the pump as it may need to be adjusted to achieve the desired flow rate.
- If water is not flowing within several moments of the fountain being plugged in, unplug the power supply for a few moments and plug it back in; the pump may have air bubbles in the filter which can prevent water from circulating properly.

Any modification or failure to follow the recommended care will void the product warranty.
